EXPERIENCE

How To Hockey · Lead *Software & DevOps Engineer*

October 2019 - PRESENT

• Built and maintained production Flutter apps, including complex workflows and in-app purchases for the 10,000 Shots app.

• Designed custom team leaderboards, stat aggregation, and real-time Firebase data streaming.

• Optimized mobile performance by refactoring caching logic into efficient live data streams.

• Implemented system snapshots, website backups, and recovery automation to ensure high availability, fast rollback, and long-term platform resilience.

• Managed CI/CD pipelines with GitHub Actions for web and membership systems.

• Gathered and translated user feedback into actionable technical updates

Georgian College · *Web Specialist, Marketing*

September 2018 - September 2019

• Collaborated with IT and marketing departments to resolve complex term-data system discrepancies.

• Translated non-technical requirements into functional, accurate website integrations.

• Ensured course and term information displayed correctly for students and parents.

• Resolved issues and communicated effectively with various departments at the college.

BugsLife Solutions · *Software Engineer/Project Manager*

September 2015 - PRESENT

• Designed & developed a Flutter app for the Group of Seven Trail featuring bluetooth beacon integration, plotting trails on an in-app map, and a custom off-site content management solution for hikers to learn more about various Group of Seven paint sites.

• Delivered websites and mobile applications for various clients, including a local construction company.

• Selected appropriate technologies for clients with limited technical experience.

• Designed easy-to-use CMS workflows tailored to real-world user needs.

LinkGreen · *Software Engineer & Integration Development Manager*

August 2017 - December 2017

• Created and tested REST API endpoints used by large B2B clients.

• Developed a Windows GUI tool enabling non-technical staff to sync local databases with cloud APIs.

• Managed KANBAN boards, GitHub workflows, and CI pipelines.

Geek Power Web Design · *Senior Web Developer*

January 2017 - August 2017

• Built custom UX solutions and modernized legacy systems using Angular and React.

• Served as a go-to developer for complex, high-detail client projects.

EDUCATION

Computer Programmer Analyst -
Georgian College
3 year Advanced Diploma

CAREER GOALS

To continue utilizing my professional skill set and passion for problem solving to innovate and improve the experiences of those around me.

HARD SKILLS

Strengths: UX Design, API integration, AI prompting.

Languages: NodeJs, Dart, Python, C#, Java, C++, Kotlin, Swift, PHP, TypeScript, SASS..

Frameworks: Flutter, React, .NET Core Angular, Express, WordPress..

Cloud: Firebase, Digital Ocean, AWS, Azure..

Network: Docker, Kubernetes, LAN config, Linux, NAS config..

Database: SQL, SQLite, MS SQL Server, MongoDB, GraphQL, Cloud Firestore, MySQL..

SOFT SKILLS

Honest, dedicated, passionate, natural leader, great at communicating with technical & non-technical stakeholders.
