

HADEN HILES

SENIOR SOFTWARE ENGINEER | PRODUCT, MOBILE & FULL-STACK ENGINEERING

Ontario, Canada | +1 (705) 984-7625 | hi@hadenhiles.com | linkedin.com/in/hadenhiles | github.com/hadenhiles

Portfolio: hire.hadenhiles.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience turning loosely defined product and business needs into production mobile applications, web platforms and integrations. Owns delivery from discovery and architecture through implementation, deployment, measurement and long-term operation. Combines hands-on engineering across Flutter, Firebase, TypeScript, JavaScript and Node.js with product judgement, UX expertise and a record of improving adoption, subscription conversion and revenue.

TECHNICAL EXPERTISE

Languages and Frameworks: Dart | TypeScript | JavaScript | SQL | Python | PHP | Flutter | React | Next.js | Node.js | Express | WordPress

Data and Integrations: Firebase | Cloud Firestore | PostgreSQL | MySQL | REST APIs | GraphQL | Payment Systems | POS Integrations

Cloud and Delivery: Docker | Linux | Git | GitHub Actions | CI/CD | AWS | DigitalOcean | DNS | Reverse Proxies | Networking

Engineering and Product: Software Architecture | System Design | Product Discovery | Requirements Analysis | UX/UI Design | Accessibility | Testing | Technical Documentation | Stakeholder Communication

PROFESSIONAL EXPERIENCE

Lead Software Engineer | HOW TO HOCKEY | October 2019 – Present

- Own the architecture, development, release management and technical direction of **10,000 Shots**, a production Flutter and Firebase application with more than **80,000 registered accounts** and approximately **2,500 daily active users**.
- Translate loosely defined business goals into product requirements, technical architecture and delivery plans, using rapid prototypes and MVPs to validate complex ideas with non-technical stakeholders before full development.
- Conceptualized and delivered team-based competition functionality that helped **double daily active users** by strengthening social engagement and repeat use.
- Designed and launched the **Challenger Road** guided-training experience and supporting freemium model, tripling subscription conversion; following launch, the app reached approximately **250 daily downloads** and **25 new Pro subscriptions per day**.
- Built and operate **The Pond**, a WordPress, LearnDash and MemberPress platform generating an estimated **\$30,000 in annual revenue** through subscriptions, digital courses, structured training and member dashboards.
- Re-architected fragmented caching and refresh logic into real-time Cloud Firestore data streams, delivering a faster user experience and a more maintainable foundation with only a marginal increase in Firestore costs.
- Introduced CI/CD, automated backups, server snapshots and recovery workflows, standardizing releases across development, beta and production and improving rollback readiness during updates and high-traffic launches.
- Built **Next Shift**, an internal Flutter and Firebase platform that centralizes feature requests, bug reports and user voting into a shared evidence base for roadmap prioritization.

Independent Software Consultant | BUGSLIFE SOLUTIONS | September 2015 – July 2025 | Freelance

- Delivered mobile, web, e-commerce and integration projects for small businesses and organizations, owning work from discovery and requirements analysis through architecture, development, deployment, training and support.
- Designed and delivered the **Group of Seven Trail** Flutter application, combining interactive mapping, Bluetooth beacons and contextual content into a location-aware visitor experience; resolved cross-platform Bluetooth failures by repairing an unsupported package, later migrating to a sustainable replacement and restructuring the application before beta launch.
- Built a custom e-commerce platform for **Appliance Shack**, integrating Reaction Commerce with their internal POS system to synchronize inventory and support operational workflows.
- Designed a benefits application service for **Calow Benefits Group** using a Node.js CMS, including spreadsheet-mapping functionality to streamline employee-record imports.

Web Specialist, Marketing | GEORGIAN COLLEGE | September 2018 – September 2019

- Partnered with IT, marketing, content authors and internal departments to resolve website, program, course and term-data issues affecting student-facing pages, while supporting integrations including Salesforce, Eloqua and Zapier.
- Built and supported WordPress functionality and content workflows while delivering AODA accessibility improvements.

Programmer & Integration Development Manager | LINKGREEN | August 2017 – December 2017

- Built REST API integrations and a Windows .NET application that enabled non-technical staff to synchronize local inventory databases with cloud platforms across varied customer network environments.
- Managed Kanban delivery, GitHub workflows, releases and CI/CD pipelines, maintaining repeatable integration processes and visibility of delivery risks.

Senior Web Developer | GEEK POWER WEB DESIGN | January 2017 – August 2017

- Led technically complex client projects, delivering custom WordPress solutions and modernizing legacy frontend systems with **React**, **Angular**, JavaScript, HTML and CSS/SCSS.
- Refactored outdated codebases, created a shared Grunt.js build pipeline and identified scope gaps before delivery, improving maintainability and reducing project risk.

Web Designer & Developer | MEDIA SUITE INC. | June 2014 – September 2015

- Designed and developed more than **50 bespoke client websites**, owning UX/UI design, responsive layouts, visual hierarchy and implementation across HTML, CSS, PHP and MySQL.
- Built custom transactional systems, including a swimming-lesson registration platform with multi-child accounts, scheduling, digital waivers and Stripe payments, alongside a bespoke shopping-cart and checkout solution.

SELECTED PROJECTS

Skill Drills | Flutter, Dart, Firebase

Designed and built a customizable training product that enables users to create reusable routines, define flexible performance metrics, complete structured sessions and track improvement across different training styles.

FamFlix | Docker, Linux, Cloudflare, Tailscale, Caddy

Designed and operate a self-hosted family media platform spanning containerized services, reverse proxies, secure remote access, monitoring and automated workflows across NAS and Windows systems.

EDUCATION

Advanced Diploma, Computer Programming Analyst | Georgian College | 2020–2021

Diploma, Computer Programming | Georgian College | 2013–2015

PROFESSIONAL DEVELOPMENT

Full Stack Open | University of Helsinki | In Progress, 2026
